

## CRITICAL COLLECTION PROBLEMS COMMITTEE

TCS-33646-69a  
CCPC-D-32/69a  
23 December 1969

MEMORANDUM FOR: The National Intelligence Resources Board

SUBJECT : Scope of Intelligence Effort Against Cuba

REFERENCE : TCS-33611-69, CCPC-D-10/69,  
dated 15 April 1969

(See CCPC  
file for  
study)

1. The attached study is a follow-on to the previous CCPC Cuba study presented to the NIRB and results from several questions asked by the NIRB following consideration of that study.

2. The current study, among other things, further highlights the fact that a considerable amount of our intelligence effort is based upon commanders' contingency plans which call for a quick-reaction military capability against Cuba. In re-enforcement of this view are the following:

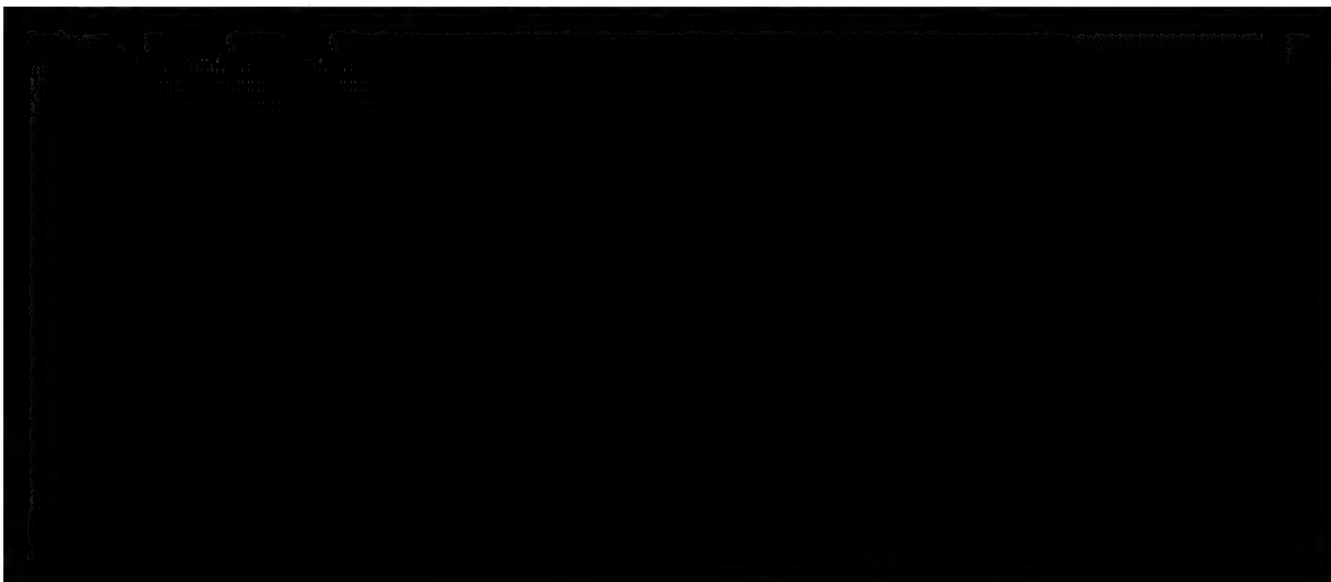

25X1D

NO FOREIGN DISSEM  
TOP SECRET RUFF UMBRA

HANDLE VIA  
TALINT-MAIN AND COMINT  
CONTROL BYIN AND JOINTLY

3. It had been hoped that the U.S. policy toward Cuba, to be modernized under NSSM-32, would be completed this Fall so that our assessment of intelligence needs could be related to an updated authoritative policy. The statement of policy has gone through several drafts but has unfortunately not yet been completed and no clear statement of U.S. policy has been obtainable.
